Yanis will cash out the 0.00101 Bitcoin which have been received in donations worth CHF 91.

Remains CHF 1094. This is TZS 3'400'000 as of today's rate.

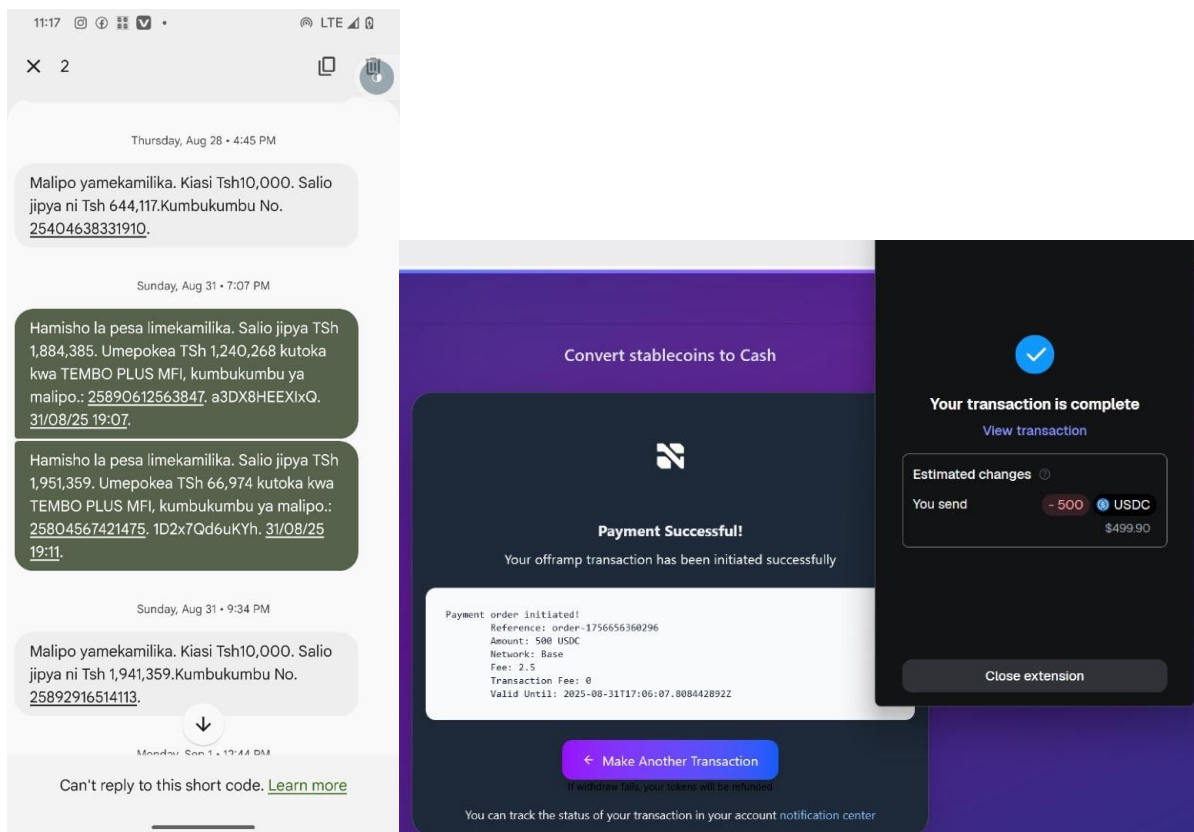

So I will personally take TZS 3'400'000 via Nedapay to my personal phone number and keep them. The rest I will send to Modest, so he can buy peripheral equipment.

31.08.25, 19:11, Yanis: I sent 500 USDC and 27 USDC to Modest.

with this he will buy used screens, keyboards, mouses,, extension wires and build desks.

we will update you here

so now the full 2'000\$ have been cashed out. The rest which is still in the account is what exceeded the 2'000\$. We might come back to these coins if the 2'000\$ aren't sufficient, but we try to stick within the budget first, so the overflow can be used for the next target

04.09.25, 15:29, Yanis: Today it arrived in Zanzibar, a friend of mine brought them from Switzerland. They will reach the school tonight.

But then we still have to purchase screens, keyboards, mouses, extension cables and build desks

04.09.25, 18:01, Modest: Thank you very much for the smiling faces, we have received the computer and its cables. 🙏 I still can't believe that 10 computers can fit into this small box

16.09.25, 10:31, Modest: Good morning, we are happy to say thank you very much for your great contribution to our community, you have given so much, today Tuesday we started our computer class 📖 everything is working very well, it's a great start .
